

BIOCORP wins the Pharmapack Award for its smart sensor, Easylog

Issoire, February 11th, 2016 – BIOCORP, (FR0012788065 – ALCOR / PEA-PME eligible), a French company specializing in the development and manufacturing of innovative medical and drug delivery devices announces today that it has won the Best Exhibitor Innovation Award presented by Pharmapack Europe 2016 rewarding Easylog, Biocorp's smart sensor. The ceremony was held on February, 11th at Paris Expo.

The Awards are organized alongside the Pharmapack Europe conference and exhibition each year from its inception in 1997 onwards, and reward the best innovations in the pharmaceutical industry every year.

Biocorp's smart sensor Easylog has received an award in the category Best Exhibitor Innovation for "customization and user-friendliness" acknowledged for being an intuitive real time monitoring tool for patients and health care professionals.

EasyLog, a smart sensor for drug delivery systems

Easylog is a smart sensor that converts all insulin delivery devices, reusable as well as disposable, into internet-connected and communicating devices. Easylog mobile application provides users with reminders for drug delivery, alerts in case of double injection, real-time access to patients' historical data and personalized logbook. Easylog is an innovative solution that meets the challenges of personalized medicine and is a crucial tool to ensure the highest quality of treatment against chronic diseases, improving the patient's comfort and providing relevant information for treatment follow-up to healthcare professionals.

Back in 2015, Biocorp had already been awarded by Pharmapack for its Datapen, a connected injector pen.

« We are very honored to receive this new Award presented by Pharmapack Europe. Following Datapen in 2015, it is the turn of our Easylog smart sensor to be in the public eye. Easylog is a unique solution that contributes to the increase of the compliance rates, which are still very low among patients suffering from chronic diseases. Our contribution in this field aims to improve the patient's comfort and data reliability for all stake holders. We are extremely proud to receive the Pharmapack Award which highlights once again our innovations and the major progress they bring », commented Jacques Gardette, Biocorp's CEO and founder.

ABOUT PHARMAPACK AWARDS

Coinciding with Pharmapack Europe Exhibition since its first edition in 1997, the Pharmapack Awards have been rewarding the best innovations in the pharmaceutical industry every year.

In 2016, Pharmapack Europe awarded two categories within the framework of the Pharmapack Awards:

- Best Health Products: This award category is dedicated to the visitors' innovations. The prize will reward the pharma companies and the suppliers that they have worked with to develop the product. It can be a health product launch or an enhancement of an existing product for which the packaging has been improved.
- The Exhibitor Innovation: This award will recognize the best innovations among the exhibitors' innovations displayed in the Innovation Gallery. The jury is made up of over 380 companies. The award ceremony was held by decisions makers in the pharmaceutical R&D and purchasing for packaging fields.

About BIOCORP

Founded in 2004 in Issoire (near Clermont-Ferrand, France), Biocorp is a French company specializing in the development and manufacturing of medical devices and innovative drug delivery systems. It is listed as 'Innovative Company' by the French public investment bank Bpifrance. With over twenty years of experience and more than 30 manufactured products, Biocorp is a key player in the industry, providing drug delivery solutions that meet the evolving needs of patients. Today, Biocorp continues to innovate in the area of medical plastics, its core business, and to market traditional devices (alternative to aluminum capsules, syringe and vial administration systems) that have been an important source of recurring income. Its solid expertise and capacity to innovate have allowed the company to develop new internet-connected products, including: the DataPen, a reusable smart injection pen that automatically transmits data to a mobile app, helping patients to manage their treatment; and treatment management add-ons, which adapt to existing delivery devices and are compatible with most injection pens in the market. The company has a team of 43 employees.

Biocorp is listed on Alternext since July 2015 (FR0012788065 – ALCOR). For more information, please visit: www.biocorp.fr
